

## Important change for Wilson disease patients taking Galzin®

Are you prescribed Galzin® (zinc acetate) capsules by your doctor?

Galzin® was recently bought by Eton Pharmaceuticals, a pharmaceutical company with therapies for patients suffering from rare and overlooked conditions.

What does this mean for Wilson disease patients taking Galzin®?

Starting March 3<sup>rd</sup>, 2025, Eton's specialty pharmacy services provider, **Optime Care**, will handle dispensing and patient assistance programs. Patients prescribed Galzin® will be automatically enrolled in Eton Cares, which includes:

- **\$0 co-pay** for patients with insurance
- **Quick start program** to provide patients Galzin® in as little as 24 hours
- Enhanced **Patient Assistance Program** for uninsured or underinsured patients, including Medicare
- Insurance specialists to assist with coverage needs
- Pharmacist consultation, refill reminders, and regular check-ins.

Galzin® is the only FDA-approved zinc acetate for maintenance treatment of patients with Wilson disease who have been initially treated with a chelating agent.

Starting March 3, your care team can deal exclusively with Eton's specialty pharmacy, Optime Care. Their phone number is 833-442-5946 and email is [etoncares@optimecare.com](mailto:etoncares@optimecare.com).

If you, your pharmacist, or doctor have any questions, you can also reach out to Eton Pharmaceuticals at 847-787-7361 or email [info@etonpharma.com](mailto:info@etonpharma.com).
